Linda Hanssens is Global Medical Affairs Lead for DTP and polio and Hib vaccines at GlaxoSmithKilne (GSK). She has been at the company since 2008, previously holding the positions of Director of Global Medical Affairs for DTP, Neisseria and polio vaccines, and for Synflorix. During her time at GSK, Dr Hanssens has created and led global medical affairs strategies for a number of products, instigated core scientific documents, supported product launches and helped to deliver global advisory boards.

Dr Hanssens began her career in clinical research, leading Phase II and III studies at Pfizer Central Research, Aventis and Bristol-Myers Squibb (BMS). At BMS she took on managerial roles in global epidemiology and outcomes research before becoming Associate Director for EU markets and lead for Europe, the Middle East and Africa, and then Associate Director Global Medical Affairs Neuroscience for the same region.

Dr Hanssens earned her Doctorate in Medical Sciences at the University of Liège School of Medicine, Belgium. Dr Hanssens has co-authored numerous scientific publications.
