National Cancer Institute
9609 Medical Center Drive
Rockville, Maryland USA 20850
Tel: 410-266-1074
e-mail: quinnt@mail.nih.gov

Theresa Quinn is a Biomedical and Clinical Research Information Specialist with the National Cancer Institute's Enterprise Vocabulary Services. Ms. Quinn began her career as a registered nurse, working for fifteen years in a variety of medical fields, including the Emergency Department, Interventional Radiology, Pediatrics, and Telemetry. After nursing, Ms. Quinn returned to school and earned a degree in Information Management Systems. Her career in terminology work began in 2003, with the National Library of Medicine as an editor for the Unified Medical Language System (UMLS). She moved to her current position at NCI/EVS in 2006, where her responsibilities include leading working groups on several different terminology projects within the NIH, including the FDA, NICHD, Centers for Disease and Radiological Health, and the National Council on Prescription Drug Programs. Outside of work, she donates her time and expertise in information management by serving as the administrator for the websites of several non-profit organizations, as well as creating multiple databases for use in a variety of non-profit sectors, including a library in Italy and a food pantry/outreach program in southern Virginia.
